CARIOCA[®] IS BACK TO SCHOOL!

School program to develop creative thinking across the play!

We believe that education can change the world, as often outstanding figures have affirmed. However, education is not only "Maths, Literature & Science". Other skills are important to the success of our children. Creativity is one of them. It is innate in every children but often forgotten and denied while growing up. Creativity can be learned as well as the other topics. Training and practice will empower it, raising it to higher level. Therefore, we believe that creativity must formally become part of our children's education curricula.
